Some fonts with recent \TeX support

Karl Berry

\LaTeX support for many new typeface families has been created in recent years. Here is an extremely terse visual overview of most of those appearing in the past year or so. All the fonts are shown here at their own nominal size of 10pt.

All the fonts shown here are available in Type 1 format. Almost all are also available in OpenType or TrueType, but fonts available only in OpenType/TrueType are omitted, regrettably.

Each of these families has its own set of additional variants (bold, bold italic, small caps, different encodings, etc.). For more complete showings, exact package invocations, the myriad other fonts available, etc., please see the urls in the signature.
