

In 2-column mode, labels can be much too long. *viz.*

Asociación Castellano Leonesa de Afectados de Retinosis Pigmentaria ... further information...

Asociación de Padres de Sordociegos de España (APASCIDE) Barcelona ... further information...

Using `\parbox` in the `\item[...]`

Asociación Castellano Leonesa de Afectados de Retinosis Pigmentaria ... further information...

Asociación de Padres de Sordociegos de España (APASCIDE) Barcelona ... further information...

```
\item[\parbox{\columnwidth}{Asociación Castellano Leonesa de Afectados de Retinosis Pigmentaria}]
...further information...
```

You can control the vertical spacing within and below these long labels as follows:

Asociación Castellano Leonesa de Afectados de Retinosis Pigmentaria ... further information ...

Asociación de Padres de Sordociegos de España (APASCIDE) Barcelona ... further information ...

```
\item[\parbox{\columnwidth}{\addtolength{\baselineskip}{-2pt}%
Asociación de Padres de Sordociegos de España (APASCIDE) Barcelona\[-5pt]\hss}]
...further information...
```

Best is to wrap up this construction into a new command `\longitem` say; *viz.*

```
\newcommand{\longitem}[2] [-5pt] {%
\item[\parbox{\columnwidth}{\addtolength{\baselineskip}{-2pt}#2\[#1]\hss}]}
```

then use: `\longitem{... long label ...} ... further information ...`
