as possible. To accomplish this goal, your brain will try to read as few words as possible and spend only a fraction of a second on each word. Normally, when reading a text, people use a strategy that I call "reading for content". The goal of this strategy is to get the main idea of the text as quickly as possible and with as little effort as possible. To accomplish this goal, your brain will try to read as few words as possible and spend only a fraction of a second on each word.
