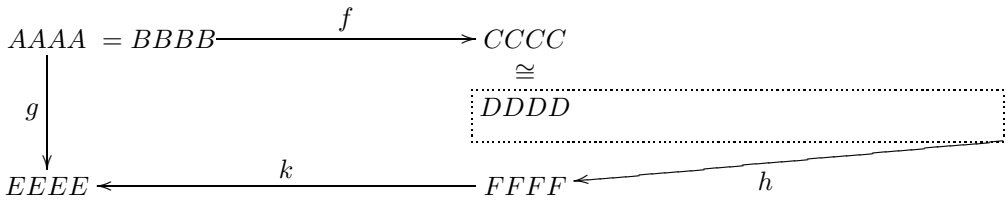
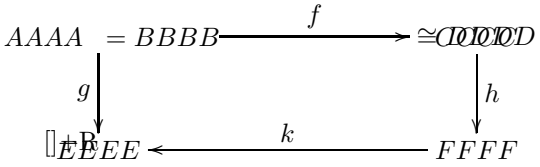
Here we try using XY-matrix:



Notice how the frame around $DDDD$ extends too much down and *far* too much to the right; note also how the arrow h originates from the bottom right hand corner of the frame. Both of these are clearly wrong.

And again using XY-graph



What the hell is going on here? The escape `!{[]+R}` is working, but it's *also* appearing as text in the diagram. I give up!
