gift2latex: Example of use

Luis García, Coromoto León and Casiano Rodríguez

January 10, 2006

Name: **Student:**   **Group:**

Exercises

1. Given a *grammar* $G = (\Sigma, V, P, S)$ and a *production* $A \rightarrow \alpha$ it holds that $FIRST(\alpha) = \emptyset$ implies A is annullable?

   ○ TRUE   ○ FALSE

2. A multidimensional array in C is simulated defining 1 dimensional arrays whose elements are arrays. To compute the relative position of one element $a[i_1, i_2, ..., i_k]$ the following formula is applied:

   ○ $(i_k + D_k(...(i_2 + i_1 * D_2...)) * size + base - (L_k + D_k(...L_2 + L_1 * D_2...)) * size$
   ○ $(i_k + D_k(...(i_3 + (i_2 + i_1 * D_2) * D3)...)) * size + base$
   ○ None of them

1. Answer to exercise 1 (page 1):

   Given a *grammar* $G = (\Sigma, V, P, S)$ and a *production* $A \rightarrow \alpha$ it holds that $FIRST(\alpha) = \emptyset$ implies A is annullable?

   FALSE

2. Answer to exercise 2 (page 1):

   A multidimensional array in C is simulated defining 1 dimensional arrays whose elements are arrays. To compute the relative position of one element $a[i_1, i_2, ..., i_k]$ the following formula is applied:

   $(i_k + D_k(...(i_2 + i_1 * D_2...)) * size + base - (L_k + D_k(...L_2 + L_1 * D_2...)) * size$
