

柳宗元

《漁翁》

漁翁夜傍西巖宿，
曉汲清湘燃楚燭。
煙銷日出不見人，
欸乃一聲山水綠。
迴看天際下中流，
巖上無心雲相逐。

A poem by Liǔ Zōng Yuán (柳宗元, 773–819), displayed on the left with traditional characters and on the right using “simplified” characters. The L^AT_EX CJK package interfaces nicely with Emacs/Mule, so that different character sets (Big5 for traditional characters, GB2312 for “simplified” characters) can be mixed within the same file. This is especially useful in this case, since the character 欸 *ǎi* is not part of the GB2312 character set, so I substituted the correct Big5 character on the right hand side. The input file was exported using the Emacs function `cjk-write-file` supplied by the CJK package and the resulting file was processed with pdfL^AT_EX.
