

# The overpic environment with relative positioning<sup>1</sup>

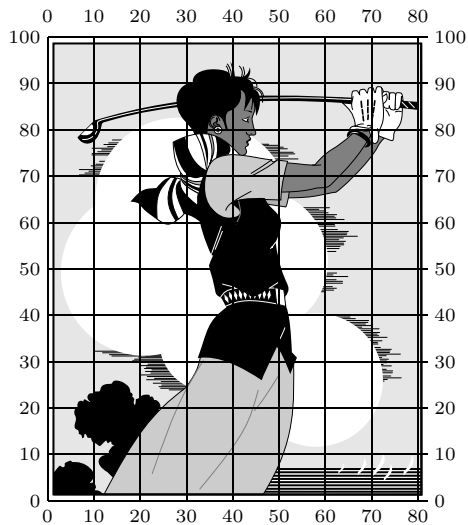

Insert before:

```
\usepackage[percent]{overpic}  
(default) or  
\usepackage[permil]{overpic}
```

The original graphic from GHOSTSCRIPT:

```
\includegraphics[scale=.25]{golfer.ps}
```

A grid for orientation:

```
\begin{overpic}[scale=.25,grid,tics=10]%  
  {golfer.ps}  
\end{overpic}
```

(default for `tics` is 10 for 'percent' and 100 for 'permil')

Positioning the L<sup>A</sup>T<sub>E</sub>X output with `\put` commands:

```
\begin{overpic}[scale=.25]{golfer.ps}  
  \put(5,45){\huge \LaTeX}  
  \put(55,10){\includegraphics[scale=.07]%  
    {golfer.ps}}  
\end{overpic}
```

(`\unitlength` is internally set to 1/100 or 1/1000 of the length of the picture's longer side)
