Ref: LaTeX Guidelines for paper preparation for the *International Journal for uncertainty quantification (IJ4UQ)*

Dear Author:

This directory contains the LaTeX style files and a template for the preparation of manuscripts for the IJ4UQ. In particular

- **Template for IJ4UQ.tex** is the main LaTeX file that provides the overall format for the paper preparation. The corresponding PDF file shows the published format of an accepted paper.
- **ij4uq.cls** is the style file for this journal based on which you will need to prepare your document.
- **IJ4UQ\_Bibliography\_Style.bst** is the required style for the bibliography.
- **References.bib** is a text document containing an example list of references using BibTeX formatting.
- **Fig1.eps** is an example of the required format (.eps) for figures.
- **IJ4UQ-KeyWords.pdf** provides a list of key words that can be used to identify the focus of your paper. If different key words are needed, please add them as well.
- **FontInstallation.pdf** is a brief font installation instruction.

Please note that while submitting the paper for review, you will need to prepare your PDF document by changing the two first lines of the .tex file as follows:

```
\documentclass[review,article,ij4uq]{ij4uq} % review version %  
\documentclass[article,ij4uq]{ij4uq} % final version
```

This will allow double spacing and numbering of lines thus facilitating the review process. The current option in the .tex file prepares the document in its final accepted version.

The LaTeX templates provide guidelines for entering multiple addresses for the authors or one common address. The corresponding author information including Email and URL (if available) are required.

The font *Palatino* is **REQUIRED** by the journal style. Please be sure that this font is included in your TeX distribution. Otherwise, the font can be downloaded from [this page](#).

A brief font installation page can be found [here](#) or in the FontInstallation.pdf file.
