The breakurl package cannot handle htmladdnormallink

Tom Schneider

2021 Aug 28 version 8.1

This is a test of the breakurl package of LaTeX (TeX Live 2021), breakurl version 1.40 (2013/04/10)

It wraps just fine with url:

`http://www.cambridge.org/us/academic/subjects/physics/statistical-physics/theory-thermodynamics`

Using breakurl the url goes off the right side of the page using the htmladdnormallink form of the link. Using mybreakurl the url functions but two copies show up:

`http://www.cambridge.org/us/academic/subjects/physics/statistical-physics/theory-thermodynamics`
http://www.cambridge.org/us/academic/subjects/physics/statistical-physics/theory-thermodynamics
