Acknowledgement

This is the acknowledgement chapter where I acknowledge anyone and everyone who has helped in finalising the thesis

THE S I S

Chapter 1

Introduction

This is my first chapter and this goes on to lay down the brilliant flaw in the established theories on which I am working on my doctoral thesis. Good luck to me.

Chapter 2

Review of Literature

This is the chapter where I review the established work done so far, both in my country and abroad and the proceed to show why all the work done so far is worthless.

2.1 The Story

This story can fit 175-225 words. The purpose of a newsletter is to provide specialized information to a targeted audience. Newsletters can be a great way to market your product or service, and also create credibility and build your organizations identity among peers, members, employees, or vendors [6].

First, determine the audience of the newsletter. This could be anyone who might benefit from the information it contains, for example, employees or people interested in purchasing a product or requesting your service. You can compile a mailing list from business reply cards, customer information sheets, business cards collected at trade shows, or membership lists. You might consider purchasing a mailing list from a company [1, 7, 5].

If you explore the Publisher catalog, you will find many publications that match the style of your newsletter. Next, establish how much time and money you can spend on your newsletter. These factors will help determine how frequently you publish the newsletter and its length [4]. Its recommended that you publish your newsletter at least quarterly so that its considered a consistent source of information [8]. Your

customers or employees will look forward to its arrival[3, 2].

Chapter 3

Research Methodology

This is where I demonstrate how I went about the whole business

Chapter 4

Findings

These are my findings and outputs

4.1 Net Cash Flow

The table 4.1 shows the expected net cash flow of project A and project B.

Year	Cash Flow Project A	Cash Flow Project B
0	-40,000	-20,000
1	8,000	7,000
2	14,000	13,000
3	13,000	12,000
4	12,000	-
5	11,000	-
6	10,000	-

Table 4.1: Expected Net Cash Flow

4.2 The Theory

And here is a graphics (figure 4.1) which shows my theory in pictures. This figure is on page 7.

Figure 4.1: The Rise and Fall of Population

Chapter 5

Conclusion

This is the concluding chapter and I wind up my thesis here

A P P E N D I X

Appendix A

Some Annuxere Name

This is the first Appendix

Appendix B

Some Annuxere Name

This is the Second Appendix

Appendix C

Some Annuxere Name

This is the Third Appendix
